BROWN SUGAR CANE

NATURE TO GO

Our appetite for sweet things is now good for nature too. The sugar cane juicing process produces large quantities of fibres. This valuable biomass can be used to produce very robust, water-resistant packaging or inlays – such as the *naturesse*® take-away dishes and bowls made of brown sugar cane.

This natural product is suitable for cold and hot meals and can be used in **microwave, oven and freezer**. **With their natural look and outstanding properties**, these dishes and bowls are a delight for both people and nature.

The wide assortment comprises dishes in all shapes and sizes, ideal for an impressive range of applications. **Matching stackable lids made from sugar cane or PLA** round off this versatile takeaway concept. A forward-looking innovation through and through, elegant and functional down to the last detail.

POSSIBLE APPLICATIONS

IN NATURAL PERFECTION

Taking the limits off takeaways: All the dishes and bowls are not just warmly recommended for oven, microwave and freezer, the stackable lids also make this complete solution a hot trend.

Freezer -25°C

Stackable lids

Microwave 800 W
for 10 min.

Oven 220°C
for 30 min.
